

GREEN MARINE MAGAZINE

MEDIA KIT

SPOTLIGHT ON ENVIRONMENTAL EXCELLENCE

Green Marine Magazine is a must-read to stay up to date with Green Marine's progress and the maritime industry's environmental initiatives – particularly those being undertaken by the program's members. In June 2022, the Magazine shifted to a fully digital format for its 24th issue. The Magazine is circulated to almost 4,600 subscribers – a loyal and engaged readership – and is also available on the Green Marine website.

This unique communication tool responds to the maritime community's keen interest in learning more about the environmental initiatives of ports, terminals, shipyards and ship owners locally and throughout North America. The publication includes scientific breakthroughs, innovations in green technologies, and best management practices. By purchasing ad space in the magazine, you are now also directly supporting Green Marine, with all profits from magazine revenue being reinvested in the environmental certification program's further development.

READERSHIP

- Canadian and U.S. ports

- Research and development institutes and firms
- Training institutes and facilities
- Research, education and conservation organizations
- Green Marine Europe's network of members

AD PLACEMENT

Green Marine Magazine offers two main types of advertising placement:

- On the magazine's home page, where the topics of all the magazine issues are displayed.
- Alongside one of the issue's articles, where there are several ad placement options.

All banners are clickable and lead to a link determined by the advertiser.

Please note that your ad will be posted in the English and French online Magazine. Therefore, you can either submit to us an advertisement with adapted content in each language, a bilingual ad, or simply one in the language of your choice.
